

INTOUCH® PROJECT SMILE Volume 20

INTOUCH WITH THE FUTURE

October 2020

by Cannie Chen

Project Smile is an initiative by Kossan International Sdn Bhd (KISB) to develop, sustain, and perceive a good relationship between our internal and external community. Initiated since 2013, Project Smile has extended support and contribution to the environment and communities in need.

It is 100% run by Kossan employees voluntarily. We look at many areas in contribution projects from schools, orphanages to animals, environment and the less fortunate. It is also a program about developing future leaders through social awareness and motivational activities. We believe that children are the hope for a brighter future, and we want to provide them with opportunities and hope for a better life.

Project Smile 23.2 – We care, we help, we can win this!

KISB volunteers have reached out to help the hospitals, schools, and kindergarten by distributing hand sanitizer and liquid hand soap to maintain a safe environment during this pandemic.

With The Future

Project Smile

Nurturing GREAT LEADERS Of Tomorrow

Project Smiles advocates the importance of hand hygiene by donating hand sanitizer and liquid hand wash to the people in need to maintain their personal hand hygiene. We distributed 3,000 bottles of 60ml hand sanitizers to support 5 hospitals in Klang valley.

While for schools and kindergartens, we contributed hand sanitizers and liquid hand soaps for the children to maintain good hand hygiene.

Good hand hygiene practices is crucial to prevent the spread of virus. Soap can break down the oily lipid membrane around the virus that keeps it alive with at least 20 sec hand wash each time.

Clean hands save lives!

How to wash your hands the correct way:
